About Me

From the moment I produced “Hello World” in the console of my first application, I knew I was hooked into the world of web development. But web development has never been “just a job” for me, it’s offered and engaging challenge to continually learn and improve my skills in creating high-quality projects. What started with a simple “Hello World” has become a full-fledged passion that only gets more exciting as the years go by.

Below you’ll find projects I’ve completed that showcase my skills and general background in web development

EXPERIENCE

React Food Order App => [GitHub Repo Link](#)

React App built with **Vite**. In the project I’ve used **useState hooks** and **CSS module classes** for styling =>
Features: Browse food items, Add items to cart, Remove items from cart, Place an order.

React Todo App => [GitHub Repo Link](#)

React App built with **Vite**. In that project my main goal was to practice “**passing props**” and components structure. In the last projects I’m using Vite over CRA.
Reasons: Faster updates, Faster build time.

Vanilla JS random user => [GitHub Repo Link](#)

Vanilla JS mini project. In this project my main goal was to practice API/fetch and JS Promises.

```
fetch('https://randomuser.me/api')
```

Hangman Game with PYTHON => [GitHub Repo Link](#)

This is a classic Hangman game built with Python. The game randomly selects a word from a list of words and the player must guess the word by suggesting letters, one at a time, within a certain number of attempts.

Skills

Languages & Technologies:

HTML5 CSS3 JAVASCRIPT REACT GIT GITHUB PYTHON

Education

National Academy for Theatre and Film Arts

- M.A. Master of Arts – Events Directing and Management
- Bachelor’s Degree
